

## Improve efficiency by faster operator response

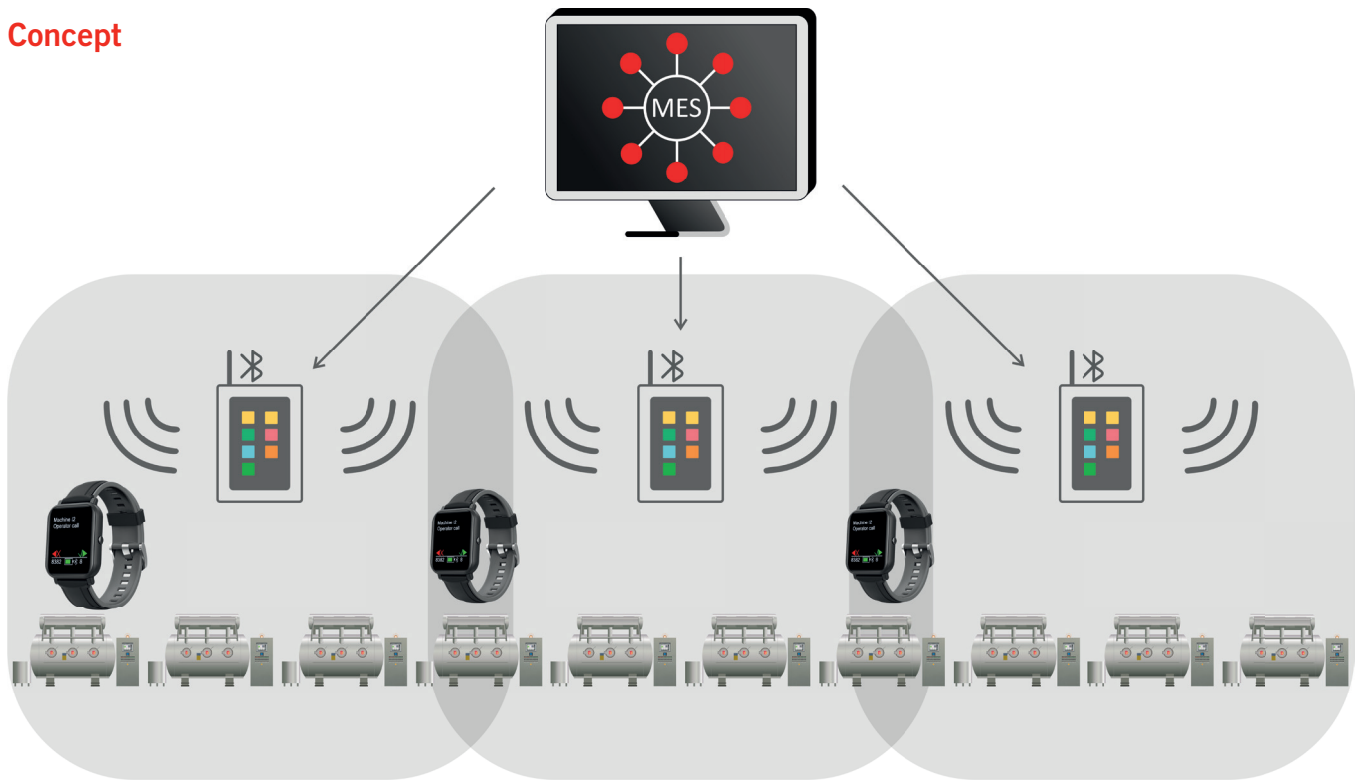

### Smart wearable device for Smart Factory concept

The Smart Bracelet is an intelligent tool for immediate operator notification. The wearable device communicates with the machines of the shopfloor via SedoMaster and data units, receives important operator calls, preparation calls as well as alarms and informs the operator immediately. The vibration of the bracelet can even be noticed in noisy environments. This results in faster reaction times, minimizing machine downtimes and increased machine and operator efficiency.

- Touch controlled wearable device with configurable settings
- Support of multiple bracelets
- More flexible and efficient production
- Smart IoT technology

## Concept

With the Smart Bracelet, operators receive all immediate notifications directly on their wrist even when the operator is not next to the machine. The wristband is connected to the data units which receive operator calls and alarms from SedoMaster. Settings and messages for the Smart Bracelet can be configured and specified for different operators.

## Specifications

- Connection via SedoMaster and wireless data units
- Compatible with DU11 (as of version 07), DU9, DU3
- 176x176 pixel color graphics display with light and dark mode
- Bluetooth Low Energy
- Waterproof IP67
- Several days battery life
- Fast charging in a USB port
- Multi-language, including Asian languages
- 8 port USB charger available
